THE STORY BEHIND HCL BREAKTHROUGH

We created HCL Breakthrough to fill an important gap in overall gut health. HCl levels begin dropping when people hit their 30s. This might sound counter intuitive, but it's a lack of stomach acid that leads to heartburn. Gas builds up in the stomach and opens up the oesophageal valve, which allows the food content to rise up.

HCL Breakthrough is a unique blend of HCl, enzymes and other molecules that can help people improve their digestive health significantly. The combination of the ingredients and cofactors is truly an HCl breakthrough.
