## THE STORY BEHIND P3-OM

P3-OM is an incredibly unique probiotic strain called *L. Plantarum* OM. It was created by our of our mentors, Dr. Michael O'Brien. We call it the "Navy Seal of Probiotics" because of how it was developed. It was created by putting *L. Plantarum* into an intense acidic environment where only 5% survived. These survivors evolved into a new species of *L. Plantarum*.

Based on our extensive lab tests, it has incredible unique properties such as:

- It digests protein (very few probiotics do that)
- It produces a significant amount of GABA in the gut
- It affects many bad bacteria in the gut

The development process of P3-OM created a true probiotic breakthrough.
